

Billings Clinic

Patients and visitors are required to wear a face mask while at Billings Clinic. Here's why:

- CDC recommends that masks be worn in health care settings, even for fully vaccinated people.
- Health care is different. We are taking care of very sick, vulnerable patients and it's our duty to protect them.
- We're not through the pandemic and COVID-19 is still in our community.
- Community vaccination rates aren't yet high enough to relax masking standards here.
- Masks and vaccines are proven to work to slow the spread of viruses like COVID-19 and are an easy way to protect our staff, guests and patients.
- No vaccine is 100% effective and masks provide extra protection.
- Reflects our commitment to take care of everybody who comes through our doors.

We ask that everybody in our facilities respect these rules, which help us protect everybody from respiratory illness. Those who do not may be asked to leave. Thank you.
