Our evidence-based design focus has produced these:
Guiding Principles for Design

Design for Safety
       No Needless Deaths or Harm
       Design to Eliminate Error
       Eliminate Workplace Injury

Design for Clinical Excellence
       Optimal Clinical Outcomes
       Focus on Quality
       Design for Process Improvement
       Interdisciplinary Teamwork

Design for Patient/Staff/Physician Experience
       Design for Consistent Image
       Compassionate, Caring Culture
       Enhance Patient/Staff Communication
       Design for Privacy
       Enhance Convenient Patient Access
       Respect for Cultural Differences
       Design for Healing Environment

Design for Integrated Delivery
       Integrated Medical Model
       Operational Effectiveness
       Strong Financial Performance
       Efficient Work Processes
       Reduce Travel Distances
       Effective Supply Chain Management
       Design for Clinical & Translational Research

Design for Strategic Innovation & Growth
       Design for Changing Technology
       Design for Flexibility
       Design for Innovation
       Future Capacity & Continuous Renewal

Design for Stewardship
       Design for Community Need
       Design for Sustainability
       Superior Health Education
       Worthy of Philanthropy
       Responsibility for ROI Models and/or Cost Control
